# Keypad Lock

## Keypad lock #6600-91 (Code +Tag)

Code

Tag

### Features:

- \* Exquisite appearance, rational structure, safe and reliable.
- \* Suitable for villa, office, military area and entertainment places.
- \* Independent electronic input-output management system: Keypad circuit and tag circuit are insulated, and insure use safely
- \* Multi-ways of high-security unlocking methods.
- \* Can set one-key opening function: pull up front cover just open door.
- \* If input wrong passwords for 3 times continuously, it will stop for 15 seconds automatically.

- \* Use 9V extra power when lower power which is safe and convenient
- \* Can add door magnetic monitoring function.
- \* Reserve many kinds of interface which can connect with home intelligent system.
- \* U-design handle is the first choice, maximum protect body.

**More:**

1. Upper Slid cover reader protection. It is anti-moisture, anti-dust, and suitable for using under all weather .
2. Using 4 x 1.5V standard alkaline batteries. It is with energy saver design for extending the battery life.
3. User can choose handle freely according to his/her favorite.
4. Battery replacements easily, 10 seconds for all the procedure. Save time and energy.
5. Soft music tone reminding and light indication, more fun and kindness.
6. Free rotating handle to avoid violent damage when it keeps working state.
7. Special lock body with "nanotechnology" surface, updated, noble durable.
8. Pure stainless steel mechanical rotating structure enable for using more than 10 years.

**Performance index:**

Power consumption:	Suitable for battery operation <400mA (driving) <100mA(Activity)<40uA(static), 9V Operating Voltage/standby voltage, 4.8v(on 6v) warning voltage, Antistatic voltage >15000V.
Working temperature:	-20°C~60°C(out door)
Keypad Capacity:	300 groups
Password length:	6 bytes
Unlock ways:	Standard: Code + Tag Substitute ways: Remote control + Mobile phone remote control

---

## Keypad Lock #6600-78 (Code + Mechanical Key)

Code

Mechanical Key

### Features:

- \* Pure stainless steel structure, firm and durable.
- \* There are two kinds of passwords: Master passwords and Sub-passwords. It is easy to be managed
- \* Change master passwords freely. Master passwords can add or delete any sub-password.
- \* One-key opening function: Freely press any key to open the lock.
- \* Mechanical key used for emergency condition.
- \* Free rotating handle, maximum prolong mechanism life and also avoid unlock by violence.
- \* U-design handle is the first choice, maximum protect body.
- \* No longer installs the electrical machinery into inside the mortise, which facilitated the maintenance work
- \* It is very easy to change batteries from the lock, just need several minutes on one lock.
- \* The installment is extremely convenient, the front lock body, the mortise and the back lock body three parts is very simple and clear.

---

## Keypad Lock #6600-88 (Code + Mechanical key)

Code

Mechanical Key

### Features:

- \* Cast alloy integrative structure, firm and durable.
- \* High quality with competitive price.
- \* Very easy to operate, suitable for office, house and apartment.
- \* There are two kinds of password: Master passwords and sub passwords, which are easy to be managed.
- \* Change master passwords freely.
- \* Master passwords can be used to add or delete any sub password.
- \* One-key opening function: freely press any key to open the lock.
- \* Put wrong passwords for three continuous times, it will stop for 10 seconds without any operation.
- \* Mechanical keys for emergency use.

---

\* There are three kind of mortise for you to adopt: Single-latch, four-latch, and five-latch.

**More:**

1. Free rotating handle, maximum prolong mechanism life and also avoid unlock by violence.
2. Pure stainless steel mechanical rotating structure enable for using more than 10 years.
3. No longer installs the electrical machinery into inside the mortise, which facilitated the maintenance work
4. The installment is extremely convenient, the front lock body, the mortise and the back lock body three parts is very simple and clear.
5. It is very easy to change batteries in the lock, just need several minutes on one lock.

**Performance index:**

Power Supply:	6V, 4 standard AA alkaline batteries.
Battery Life:	Open more than 15000 times under normal circumstance.
Open Time:	Within 5 seconds after inputting correct passwords.
Low Voltage Warning:	When CPU working voltage is less 4.5V, when you open the lock after the screen light turns on, it will alert by "di-di" tone with the red light flashing. It can still open the lock for 100 times.

---

## Keypad Lock #6600-79 (Code + Tag)

Code

Tag

### Features:

- \* Stainless steel precision foundry process adopted.
- \* Durable, safe and never fade.
- \* Two opening methods by passwords or sensing tag.
- \* Without any holes in the lock to prevent from opening by thief's universal key.
- \* Free rotating handle, maximum prolong mechanism life and also avoid unlock by violence.
- \* U-design handle is the first choice, maximum protect body.
- \* No longer installs the electrical machinery into inside the mortise, which facilitated the maintenance work
- \* The installment is extremely convenient, the front lock body, the mortise and the back lock body three parts is very simple and clear.
- \* It is very easy to change batteries in the lock, just need several minutes on one lock.

# Smart Card Lock

## Smart Card Lock #6600-66-1 (Smart Card + Mechanical key)

Smart Card

Mechanical key

### Features:

- \*Very easy to be installed. Directly install for knob locks. It is the good choice for the improvement of old hotels.
- \* Door thickness request is only 3 cm.
- \* Latch is up to international standard. Two choices: 60 mm and 70mm.
- \* Install fast and quietly. There is no effect on the daily business of hotels.

- 
- \* After the door is being shut off, lock light spring slice behind the tongue lock and extremely lock the tongue
  - \* Automatically after pigeonholing, so long as it is correct to install, it is safe and reliable.
  - \* Free rotating handle, maximum prolong mechanism life and also avoid unlock by violence.
  - \* No longer installs the electrical machinery into inside the mortise, which facilitated the maintenance work.
  - \* Inserting card jaws adopts automatically deadlocks the dustproof wall, no dust or other things can enter in; this technology is in top of the same profession.

**When install, no need to reconstruct the door, just remove the old knob door lock, then you can install one lock within 5 minutes.**

**More:**

1. Auto-prevent dust into lock, sole technology in China
2. Smart Card is Germany Siemens encrypted card with high security and durability. Be used repeatedly for 100,000 times and picked up 256 records.
3. Pure stainless steel mechanical rotating structure enable for using more than 10 years.
4. The installment is extremely convenient, the front lock body, the mortise and the back lock body three parts is very simple and clear.
5. It is very easy to change batteries in the lock, just need several minutes on one lock.

---

## Smart Card #6600-90 (Smart Card + Mechanical Key)

Smart Card

Mechanical Key

### Features:

- \* Exquisite appearance, rational structure, Safe and Reliable.
- \* Special for luxurious hotels use.
- \* Can add door open records function: 1000 times rolling type for records.
- \* Can use together with door magnetic switch link monitoring system.
- \* Reserve many kinds of interface which can connect with hotel management system.
- \* Use 9V extra power when lower power which safe and convenient.
- \* Pure stainless steel mechanical rotating structure enable for using more than 10 years.
- \* U-design handle is the first choice, maximum protect body.
- \* No longer installs the electrical machinery into inside the mortise, which facilitated the maintenance work.

---

**More:**

1. Adopt original Germany card socket, ensuring the reliable quality.
2. Upper Slid cover reader protection. It is with anti-moisture, anti-dust, suitable for using under all weather.
3. Using 1.5V 4 standard alkaline batteries. It is with energy saver design for extending the battery life.
4. User can choose handle freely according to his/her favorite.
5. Soft music tone reminding and light indication, more fun and kindness.
6. Free rotating handle to avoid violent damage when it keeps working state.
7. Special lock body with "nanotechnology" surface, updated, noble durable.
8. Pure stainless steel mechanical rotating structure enable for using more than 10 years.

---

## Smart Card Lock #6600-77 (Smart Card + Mechanical Key)

Smart Card

Mechanical Key

### Features:

- \* Pure stainless material special for European market
- \* Elegant and smooth appearance
- \* Rotate the handle freely in locked mode
- \* Adopt German DDN card plate, normally use for 200,000 times
- \* The smart card is German siemens SLE4442 logic encrypts card, can repeat use more than 100000 times.
- \* Super exquisite craftsmanship, never rusted or faded
- \* This product from cover, machine departs to MOTICE all part really adopt the stainless steel material to make machine components.

---

\* Door thickness request is no less than 2.8cm.

\* This product can be made of (OEM), that is to say, the size of mortise is provided by customer, we may defer to the customer's request to make the lock.

**The opening records will be saved in the black casket of the lock, at the same time, automatically preserves one copy to the open door card; this function is on top of the profession.**

**More:**

1. Free rotating handle, maximum prolong mechanism life and also avoid unlock by violence.
2. U-design handle is the first choice, maximum protect body.
3. No longer installs the electrical machinery into inside the mortise, which facilitated the maintenance work
4. The installment is extremely convenient, the front lock body, the mortise and the back lock body three parts is very simple and clear.
5. It is very easy to change batteries in the lock, just need several minutes on one lock.

---

## Smart Card Lock #6600-73 (Smart Card + Mechanical Key)

Smart Card

Mechanical Key

### Features:

- \* Luxury, firmness and elegance. No screw will be found in the lock surface, and with five-latch mortise.
- \* Insert the Smart Card directly into the hole on the front surface.
- \* With Anti-dust and prolong lock life.
- \* Door thickness request no less than 3.8 cm.
- \* The width of inserting card gate is the most precise and thin in the world.at present.
- \* Free rotating handle, maximum prolong mechanism life and also avoid unlock by violence.
- \* No longer installs the electrical machinery into inside the mortise, which facilitated the maintenance work

---

\* Inserting card jaws adopts automatically deadlocks the dustproof wall, no dust or other things can enter in, this technology is in top of the same profession.

**After each time opens the door, the open records will save in the black casket of the lock, at the same time, automatically preserves one copy to the open door card, this function is on top of the profession.**

More:

1. Smart Card is the German S4442 Encryption card. Safer and more reliable.
2. The "black box" in the lock can store 256 latest unlocking records that can facilitate the hotels's security and enhance the hotels' credit.
3. It is very easy to change the batteries from the lock.

---

## Smart Card Lock #6600-69 (Smart Card + Mechanical key)

Smart Card

Mechanical key

### Features:

- \* Exquisite, five-latch mortise.
- \* The handle lay with no connection, less scrape with other parts, prevent them into damage efficiently.
- \* Luxurious and suitable for three-star or more superior hotels, equip 50 locks in one day.
- \* Door thickness request not less than 3.8cm
- \* Free rotating handle, maximum prolong mechanism life and also avoid unlock by violence.
- \* Pure stainless steel mechanical rotating structure enable for using more than 10 years.
- \* No longer installs the electrical machinery into inside the mortise, which facilitated the maintenance work

- 
- \* The installment is extremely convenient, the front lock body, the mortise and the back lock body three parts is very simple and clear.
  - \* Inserting card jaws adopts automatically deadlocks the dustproof wall, no dust or other things can enter in; this technology is in top of the same profession.

**More:**

1. Smart card is the German Siemens Encryption card. It is safer and more reliable.
2. The "black box" in the lock can store 256 latest unlocking records that can facilitate the hotels' security and enhance the hotels' credit.
3. It is very easy to change the batteries from the lock.

---

## Smart Card Lock #6600-68-4 (Smart Card + Mechanical key)

Smart Card

Mechanical key

### Features:

- \* Very easy to be installed. Directly install for knob locks. It is the good choice for the improvement of old hotels.
- \* Door thickness request is only 3.2 cm.
- \* Latch is under international standard. Two choices: 60 mm and 70mm.
- \* Install fast and quietly. There is no effect on the daily business of hotels.
- \* Free rotating handle, maximum prolong mechanism life and also avoid unlock by violence.
- \* Pure stainless steel mechanical rotating structure enable for using more than 10 years.

- 
- \* No longer install the electrical machinery into the mortise, which facilitated the maintenance work
  - \* It is very easy to change batteries from the lock, just need several minutes for one lock.
  - \* Inserting card jaws adopts automatically deadlocks the dustproof wall, no dust or other things can enter in; this technology is in top of the same profession.

**More:**

1. Rotate the handle freely in locked mode, prevent malicious destroy of the lock structure
2. Smart card is Germany S4442 encrypted card with high security and durability. Be used repeatedly for 100,000 times and picked up 256 records.

---

## Smart Card Lock #6600-68-1 (Smart Card + Mechanical key)

Smart Card

Mechanical key

### Features:

- \* Very easy to be installed. Directly install for knob locks. It is the good choice for the improvement of old hotels
- \* Door thickness request is only 3.2 cm.
- \* Latch is under international standard. Two choices: 60 mm and 70mm.
- \* Install fast and quietly. There is no effect on the daily business of hotels.
- \* Because it is easy to install, and only need to tear down the old ball type lock, does not need dig another hole,
- \* It is good choice for the customer for the hotel's improvement.
- \* Free rotating handle, maximum prolong mechanism life and also avoid unlock by violence.
- \* Pure stainless steel mechanical rotating structure enable for using more than 10 years.
- \* No longer installs the electrical machinery into inside the mortise, which facilitated the maintenance work.

---

**More:**

1. With anti-dust, and which is the sole technology in China
2. Rotate the handle freely in locked mode, prevent malicious destroy of the lock structure
3. Smart card is Germany Siemens encrypted card with high security and durability. Be used repeatedly for 100,000 times and picked up 256 records.

---

## Smart Card Lock #6600-67 (Smart Card + Mechanical key)

Smart Card

Mechanical key

### Features:

- \* Exquisite, five-latch mortise.
- \* Insert your card upright on the top.
- \* With anti-dust, and which is the sole technology in China.
- \* The handle lay with no connection, less scrape with other parts, prevent them into damage efficiently.
- \* Suitable for three-star or more superior hotels, equip 50 locks in one day.
- \* Door thickness request not less than 3.8 cm.

- 
- \* Free rotating handle, maximum prolong mechanism life and also avoid unlock by violence.
  - \* Pure stainless steel mechanical rotating structure enable for using more than 10 years.
  - \* No longer installs the electrical machinery into inside the mortise, which facilitated the maintenance work

**More:**

1. Smart card is the German S4442 Encryption card. It is safer and more reliable.
2. Perfect electronic keys management and many grades management.
3. The "black box" in the lock can store 256 latest unlocking records that can facilitate the hotels' security and enhance the hotels' credit.
4. The installment is extremely convenient, the front lock body, the mortise and the back lock body three parts is very simple and clear.
5. It is very easy to change batteries in the lock, just need several minutes on one lock.

---

## Smart Card Lock #6600-66-4 (Smart Card + Mechanical key)

Smart Card

Mechanical key

### Features:

- \* Very easy to install locks. Directly install for knob locks. It is the good choice for the improvement of old hotels
- \* Door thickness request is only 3 cm.
- \* Latch is under international standard. Two choices: 60 mm and 70mm.
- \* Install fast and quietly. There is no effect on the daily business of hotels.
- \* Free rotating handle, maximum prolong mechanism life and also avoid unlock by violence.
- \* Pure stainless steel mechanical rotating structure enable for using more than 10 years.

---

**More:**

1. Auto-prevent dust into lock, sole technology in China
2. Rotate the handle freely in locked mode, prevent malicious destroy of the lock structure
3. Smart Card is Germany Siemens encrypted card with high security and durability. Be used repeatedly for 100,000 times and picked up 256 records.
4. No longer installs the electrical machinery into inside the mortise, which facilitated the maintenance work
5. It is very easy to change batteries in the lock, just need several minutes on one lock.

---

## Smart Card + Magnetic Card #6600-90 MI

(Magnetic Card or Smart Card + Mechanical Key)

Magnetic Card

Mechanical Key

Smart Card

### Features:

- \* Exquisite appearance, Rational structure, Safe and Reliable.
- \* Special for luxurious hotels use.
- \* Can add door open records function: 1000 times rolling type for records.
- \* Magnetic card present for guests freely, Smart Card is used by attendants durably.
- \* Many ways to open door: Smart Card, Magnetic Card, Mechanical Key.
- \* Reserve many kinds of interface which can connect with hotel management system.
- \* U-design handle is the first choice, maximum protect body.

---

\* No longer installs the electrical machinery into inside the mortise, which facilitated the maintenance work

**More:**

1. Adopt original Germany card socket, ensuring the reliable quality.
2. Using 1.5V 4 standard alkaline batteries. With energy saving design, and extended the battery life.
3. User can choose handle freely according to his/her favorite.
4. Free rotating handle to avoid violent damage when it keeps working state.
5. Special lock body with "nanotechnology" surface, updated, noble durable.
6. Pure stainless steel mechanical rotating structure enable for using more than 10 years.

Magnetic card is used widely in the present market because is cheap and easy to make, especially it doesn't need to recycle , when guests left, can present to guests ,all this apt to advertisement and bring more guests to move in ,so is very popular in most hotels. But the biggest disadvantage about magnetic card is it can't be durable, just normally used for about 200 times. This is bad to hotel waiter, because every day the waiter passes in and out door more than 100 times, nearly every day must replace the card, seriously affects the service efficiency and hotel's reputation. Has one kind of lock both have magnetism card the merit, but can avoid magnetism card the shortcoming? Digi magnetic together with Smart Card lock is precisely the most perfect union, in normal condition, guest use Smart Card and waiter use magnetic card(can be used more than 100,000 times) ,and also has the merit ,that is ,if the Magnetic Card reader have some problems ,the hotel offer guest the Smart Card ,never ruin hotel's visualization.

---

# RF Card Lock

## RF Card Lock #6600-93 (RF Card + Mechanical key)

RF Card

Mechanical Key

### Features:

- \* Exquisite appearance, Rational structure, Safe and Reliable.
- \* Special for luxurious hotels use.
- \* 1000 times rolling type for records, records not lose while power off.
- \* Reserve many kinds of interface which can connected with hotel management system.
- \* Choices for RF Card: America TEMIC / America TI /Germany LEGIE / Philip MIFARE1
- \* U-design handle is the first choice, maximum protect body.
- \* No longer installs the electrical machinery into inside the mortise, which facilitated the maintenance work

---

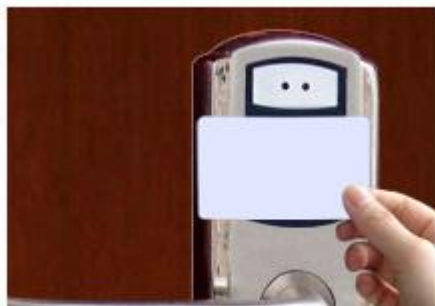

\* The installment is extremely convenient, the front lock body, the mortise and the back lock body three parts is very simple and clear.

**More:**

1. Upper Slid cover reader protection. It is with anti-moisture, anti-dust, and suitable for using under all weather.
2. Using 4 x1.5V standard alkaline batteries. It is with energy saver design and extended the battery life
3. User can choose handle freely according to his/her favorite.
4. Soft music tone reminding and light indication, more fun and kindness.
5. Free rotating handle to avoid violent damage when it keeps working state.
6. Pure stainless steel mechanical rotating structure enable for using more than 10 years.

---

## RF Card Lock #6600-76 (RF Card + Mechanical key)

RF Card

Mechanical Key

### Features:

- \* The unique pure stainless steel material in the market and whole-metal-made close electronic lock.
- \* The lock is the latest design patent item with elegance and luxury.
- \* Super exquisite craftsmanship, never rusted or faded.
- \* From the cover, machine parts to mortise, all parts adopt the stainless steel material to make machine components.
- \* We applied the European standard pure stainless steel mortise on this lock.
- \* Door thickness request is no less than 2.8cm.
- \* Choices for RF Card: America TEMIC / America TI / Germany LEGIE / Philip MIFARE.

---

**More:**

1. Free rotating handle, maximum prolong mechanism life and also avoided unlocking by violence.
2. U-design handle is the first choice, maximum protect body.
3. No longer installs the electrical machinery into inside the mortise, which facilitated the maintenance work
4. The installment is extremely convenient, the front lock body, the mortise and the back lock body three parts is very simple and clear.
5. It is very easy to change batteries in the lock, just need several minutes on one lock.

---

## RF Card Lock #6600-75 (RF Card + Mechanical key)

RF Card

Mechanical Key

### Features:

- \* Luxury, firmness and elegance. No screw will be found in the lock surface. Five-latch mortise.
- \* No plastic, cast-steel integrative structure.
- \* There is a small hole at the bottom of the front lock for POS machine to pick up the unlocking records easily.
- \* The handle lay with no connection, less scrape with other parts to protect them.
- \* Door thickness request is no less than 3.8 cm.
- \* Pure stainless steel mechanical rotating structure enable for using more than 10 years.

- 
- \* No longer installs the electrical machinery inside the mortise, which facilitated the maintenance work
  - \* The installment is extremely convenient, the front lock body, the mortise and the back lock body three parts is very simple and clear.

**More:**

1. Perfect electronic keys management and many grades management.
2. The "black box" in the lock can store 500 latest unlocking records that can facilitate the hotels' security and enhance the hotels' credit.
3. It is very easy to change the batteries from the lock.

---

## RF Card Lock #6600-72 (RF Card + Mechanical key)

RF Card

Mechanical key

### Features:

- \* No plastic, Cast-steel integrative structure.
- \* Approach the RF card near the lock light about 2cm, when the green light turns on, please turn handle to unlock the door.
- \* There is a small hole at the bottom of the front lock for POS machine to pick up the unlocking records easily.
- \* Door thickness request not less than 3.8 cm.
- \* Free rotating handle, maximum prolong mechanism life and also avoid unlock by violence.
- \* Pure stainless steel mechanical rotating structure enable for using more than 10 years.

---

\* No longer installs the electrical machinery into inside the mortise, which facilitated the maintenance work.

**More:**

1. Perfect electronic keys management and many grades management.
2. The "black box" in the lock can store 500 latest unlocking records that can facilitate the hotels' security and enhance the hotels' credit.
3. The installment is extremely convenient, the front lock body, the mortise and the back lock body three parts is very simple and clear.
4. It is very easy to change batteries in the lock, just need several minutes on one lock.

---

## Fingerprint #6600-92

(Fingerprint + Code + Tag + Mechanical key)

Fingerprint

Mechanical Key

Tag

Code

### Features:

- \* Exquisite appearance, rational structure, safe and reliable.
- \* Suitable for Villa, Office, Military Area and Amusement places.
- \* Many kinds of high-security unlocking methods.
- \* Independent electronic in-out management system.
- \* Easy to learn, use and install.
- \* Use 9V extra power, don't worry about there is lacking of power.

- \* Can add door magnetic function, standby many kinds interface to connect with varies intelligent interface system.
- \* U-design handle is the first choice, maximum protect body.

**More:**

1. Adopt international advanced induce module to ensure the reliable quality.
2. Upper Slid cover reader protection. It is with anti-moisture, anti-dust, and suitable for using under all weather.
3. Using 4 x 1.5V standard alkaline batteries. It is with energy saver design for extending the battery life.
4. User can choose handle freely according to his / her favorite.
5. Battery replacements easily, 10 seconds for all the procedure. Save time and energy.
6. Soft music tone reminding and light indication, more fun and kindness.
7. 78 fingerprint keys with strong quality, suitable for children and elder.
8. Free rotating handle to avoid violent damage when it keeps working state.
9. Special lock body with "nanotechnology" surface, updated, noble and durable.
10. Pure stainless steel mechanical rotating structure enable for using more than 10 year.

**Performance index:**

Warning Voltage:	4.8V
Antistatic Voltage:	>15000V
Working Temperature:	-20°C~60°C(out door)
Password Capacity:	78 people
Password Set Up:	Be Able to change Any Combination
Password Length:	6-digits
False Accepting Rate(FAR):	<0.0001%
Maximum Number of Templates:	150
Start Time:	<1 second
Encoding Time:	<1.0 second per encoding
Driving Time:	<0.2 second
Resolution Factor:	560 dpi
Power Consumption Suitable for Battery Operation:	<400mA (driving) / <100mA(Activity) /<40uA(static)
Operating / Reserve Voltage:	9V

---

## Fingerprint #6600-89 (Fingerprint + Mechanical key)

Fingerprint

Mechanical key

### Features:

- \* Exquisite appearance, rational structure, safe & reliable fingerprint electronic lock.
- \* Suitable for Villa, Office, Military Area and Entertainment places.
- \* High security pure stainless steel material.
- \* Independent electronic in-out management system, and insured use safely.
- \* Can add door magnetic monitoring function.
- \* Battery life: Over 15000 times to open door under normal condition.
- \* U-design handle is the first choice, maximum protect body.

**This product from cover, machine departs to MOTISE all parts adopt the stainless steel material to make machine components. Never fade!**

---

**More:**

1. Designed by Germany famous stylist, faddy and fashion.
2. Using 4 x 1.5V standard alkaline batteries. With special power design to extend the battery life.
3. User can choose handle freely according to its favorite.
4. Can set up 78 pieces fingerprints, powerful quality is especially suitable for old and children.
5. Free rotating handle when not working which avoid violent damage.
6. Pure stainless steel mechanical rotating structure enable use more than 10 years.

**Performance index:**

Logo Area :	18.2mm(L)X16mm(W)
False Rejection Rate(FRR) :	<0.1%
False Acceptation Rate(FAR) :	<0.00001%
Maximum Number of Templates :	150
Starting Time:	<1 second
Encoding Time:	<1.0 second per encoding
Driving Time:	<0.2 second
Resolution Factor:	560 dpi
Power Consumption Suitable for Battery Operation :	<400mA (driving) / <100mA(activity) / <40uA(static)
Operating / Reserve Voltage:	6V / 9V
Warning Voltage :	4.8v
Antistatic Voltage :	>15000V
Working Temperature :	-20°C ~60°C (out door)
Fingerprint Use :	At most 150 people

## Fingerprint #6600-86 (Fingerprint + Code + Mechanical key)

Fingerprint

Code

Mechanical Key

### Features:

- \* Exquisite appearance, Rational structure, Safe & reliable fingerprint electronic lock.
- \* Suitable for Villa, Office, Military area and Amusement places. It is with several ways of high-security unlocking methods.
- \* Adopt traditional knob door lock hole, no need to dig another hole, very easy to install.
- \* Battery life time: Exceed 15,000 times under normal use.
- \* U-design handle is the first choice, maximum protect body.

### More:

1. Adopt international advanced sensor technology, ensuring the reliable quality.
2. Upper Slid cover reader protection. Anti-moisture, anti-dust, is suitable for using under all weather.
3. Using 4 x 1.5V standard alkaline batteries. It is with energy saver design for extending the

45

---

battery life.

4. User can choose handle freely according to his / her favorite.
5. Soft music tone reminding and light indication, more fun and kindness.
6. Capacity for 78 fingerprints users, especially suitable for children and the old to use.
7. Free rotating handle to avoid violent damage when it keeps working state.
8. Special lock body with "nanotechnology" surface, updated, noble and durable.
9. Pure stainless steel mechanical rotating structure enable for using more than 10 years.
